**Purchasing Department
Banner Financial Information Systems Reference Manual**

Creating an Electronic Requisition

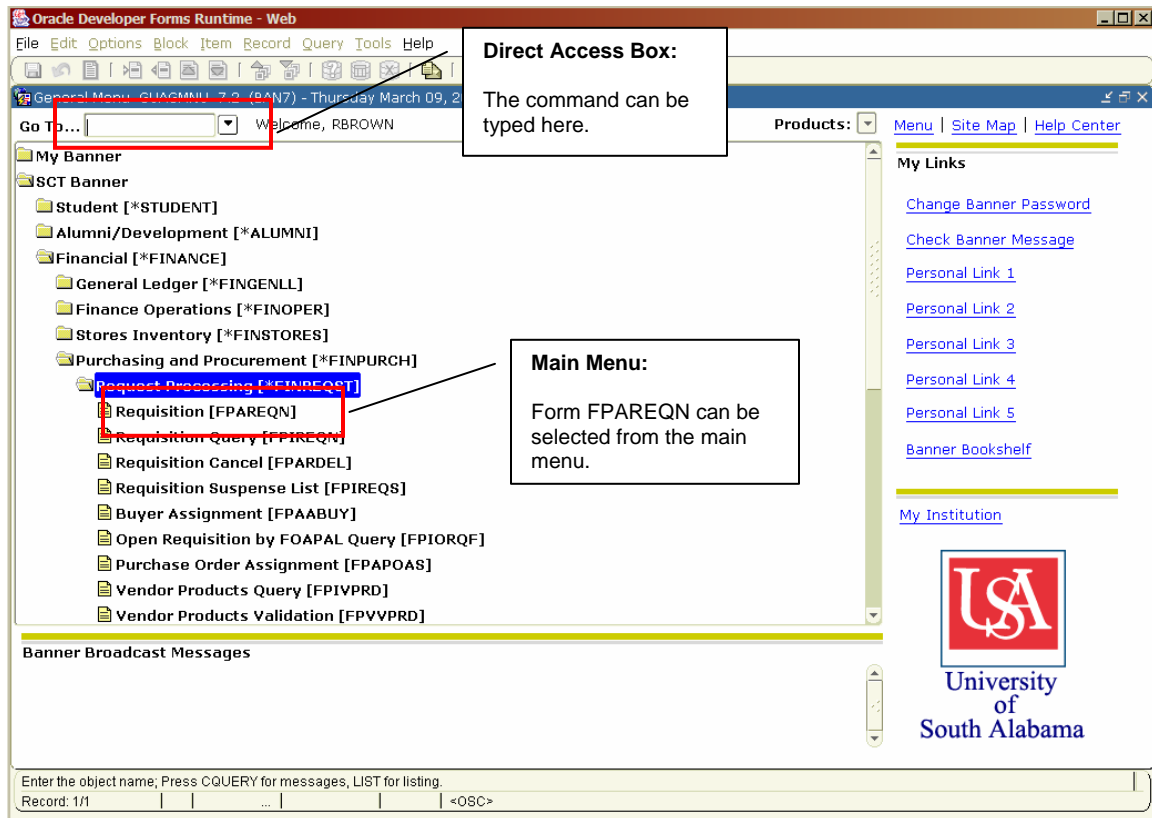

This manual provides instructions for creating Banner requisitions using:

- Document Level Accounting
- Commodity Level Accounting
- Fixed Asset Accounting

Beginning the Process

FPAREQN begins the procurement process by defining an internal request to acquire goods or services. It enables you to define departmental needs by identifying the requestor, vendor, commodity, and accounting information. Entering a vendor is optional but should be entered if possible to ensure proper order processing.

To begin the requisition development process, access form FPAREQN from the Banner main menu, or by typing FPAREQN in the Direct Access Box.

Important:

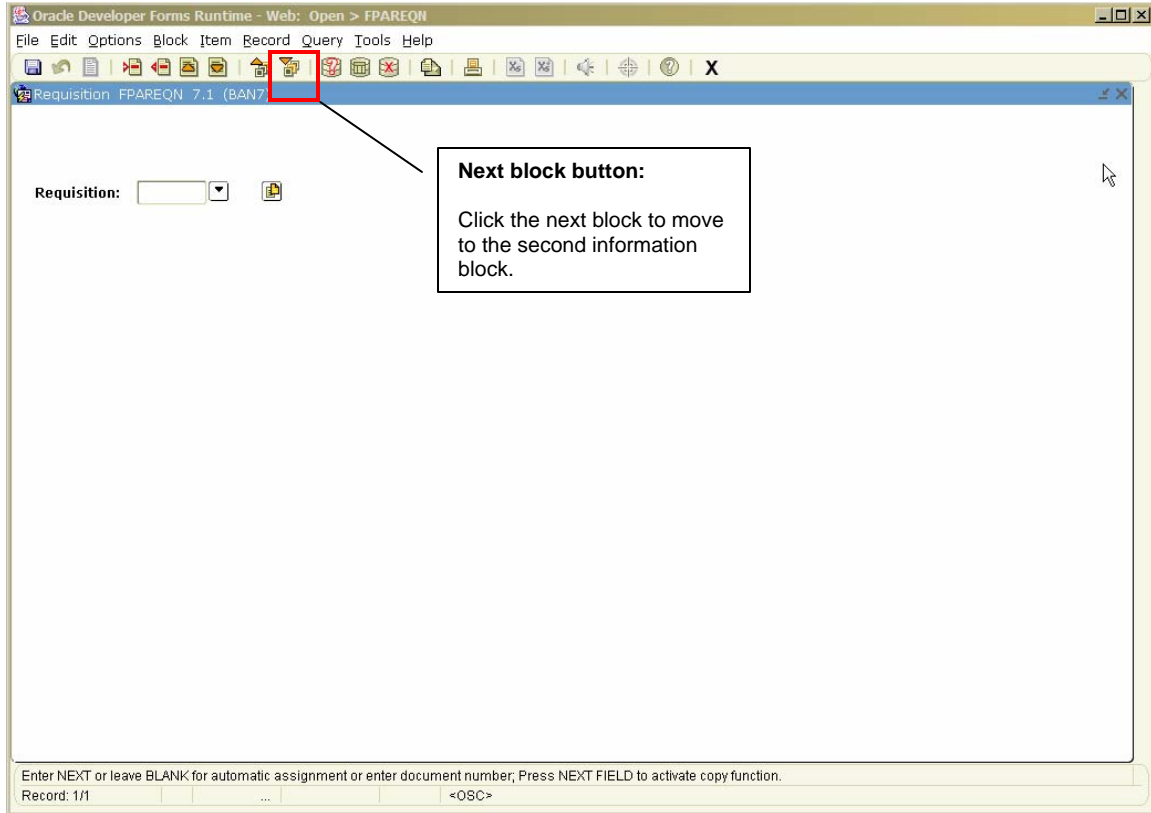

The processes noted in this manual apply only to standard purchases that require a purchase order, and do not apply to Direct Pay Purchases. Direct Pay Purchase Requisitions may be obtained from the USA Purchasing Department, or on-line at:

<http://www.southalabama.edu/financialaffairs/purchasingdepartment/forms.html>

**Additionally, this manual covers three different methods for creating electronic requisitions using Document Level, Commodity Level, and Fixed Asset accounting. The processes for all three types of requisition are identical until you reach the Commodity/Accounting Information Block on page 15.

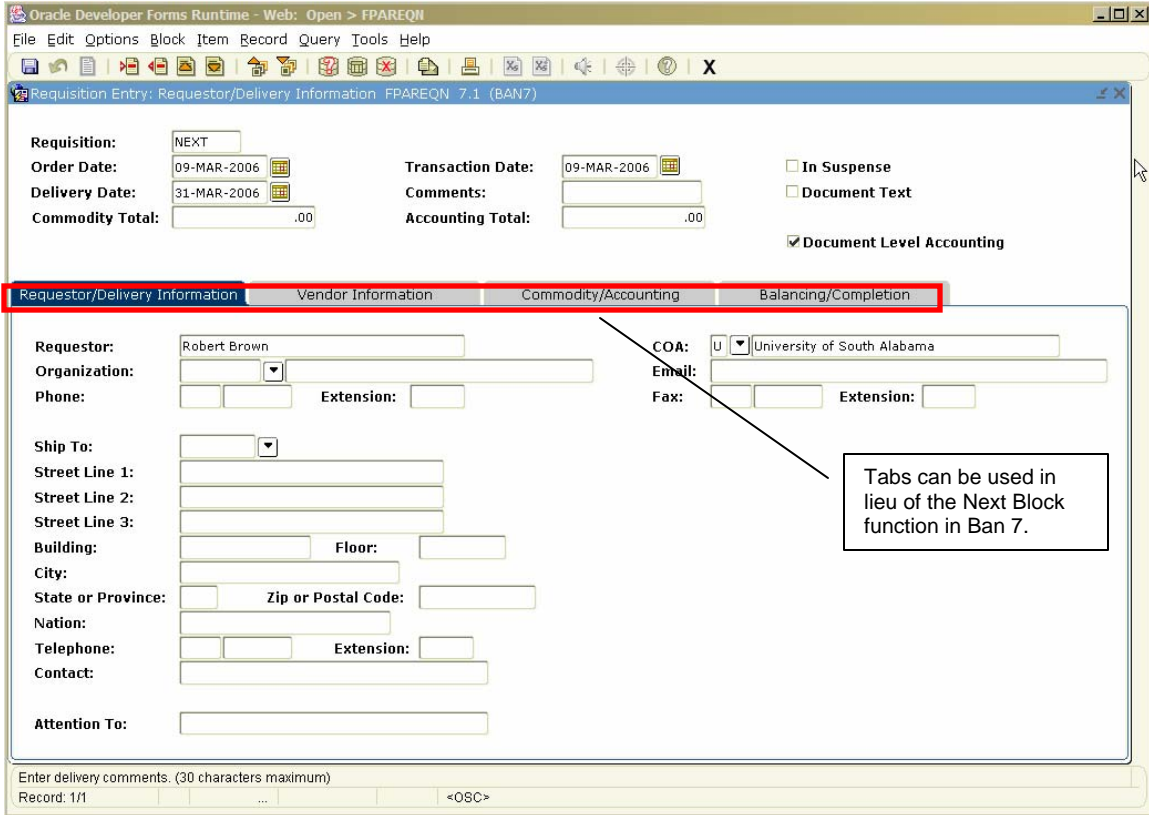

Key Information Block

After accessing FPAREQN, click **Next Block** function to enter a new requisition, or enter an existing requisition number if completing an existing requisition.

Key Information Block (continued)

After clicking the Next Block button, the following screen will appear.

The screenshot displays the Oracle Developer Forms Runtime interface for a Requisition Entry. The window title is "Oracle Developer Forms Runtime - Web: Open > FPAREQN". The menu bar includes File, Edit, Options, Block, Item, Record, Query, Tools, and Help. The main form area is titled "Requisition Entry: Requestor/Delivery Information FPAREQN 7.1 (BAN7)".

At the top of the form, there are several input fields and checkboxes:

- Requisition: NEXT
- Order Date: 09-MAR-2006
- Delivery Date: 31-MAR-2006
- Commodity Total: .00
- Transaction Date: 09-MAR-2006
- Comments: (empty)
- Accounting Total: .00
- In Suspense
- Document Text
- Document Level Accounting

Below these fields is a tabbed interface with four tabs: "Requestor/Delivery Information", "Vendor Information", "Commodity/Accounting", and "Balancing/Completion". The "Requestor/Delivery Information" tab is currently selected and highlighted with a red border.

The "Requestor/Delivery Information" tab contains the following fields:

- Requestor: Robert Brown
- Organization: (dropdown menu)
- Phone: (input field)
- Extension: (input field)
- COA: U University of South Alabama
- Email: (input field)
- Fax: (input field)
- Extension: (input field)
- Ship To: (dropdown menu)
- Street Line 1: (input field)
- Street Line 2: (input field)
- Street Line 3: (input field)
- Building: (input field)
- Floor: (input field)
- City: (input field)
- State or Province: (input field)
- Zip or Postal Code: (input field)
- Nation: (input field)
- Telephone: (input field)
- Extension: (input field)
- Contact: (input field)
- Attention To: (input field)

A callout box with a black border and white background points to the tabs with the text: "Tabs can be used in lieu of the Next Block function in Ban 7." At the bottom of the form, there is a text area for "Enter delivery comments. (30 characters maximum)" and a status bar showing "Record: 1/1" and "<OSC>".

Note: Ban7 provides the option of using tabs in lieu of the Next Block function to move between information blocks.

Requestor/Delivery Block

Enter the following information:

1. Enter the required delivery date in the **Delivery Date** field.
Note: The delivery date must be the same as or later than the order date.
2. Enter a Chart of Account in the **COA** field. (The COA for USA is “U” and should default in the Chart of Account field).
3. Enter an Organization number. In some instances, an Organizational number will automatically populate for you. If a number automatically populates, verify that the number is correct. If you need to search for an organizational number, number, click the **Search** icon to search for the number. Double click on the applicable number and the organization number will be populated in the **Organization** field in FPAPREQN.
4. To select a **Ship-To** address, click the **Search** icon next to the Ship To field and choose the correct address from the drop down menu. Note: When you select a shipping address the **Address, Phone, Contact, and Attention To** fields will be automatically populated. If a Ship To address does not exist for your specific office or location, contact the Purchasing department for assistance.
5. If not automatically populated, you can enter the name of the person who handles deliveries for your department in the **Attention To** field.

Enter name for Attention-to label on Ship-to address.
Record: 1/1 <ESC>

6. Click the **Next Block** function to proceed to the Vendor Information screen.

Document Text

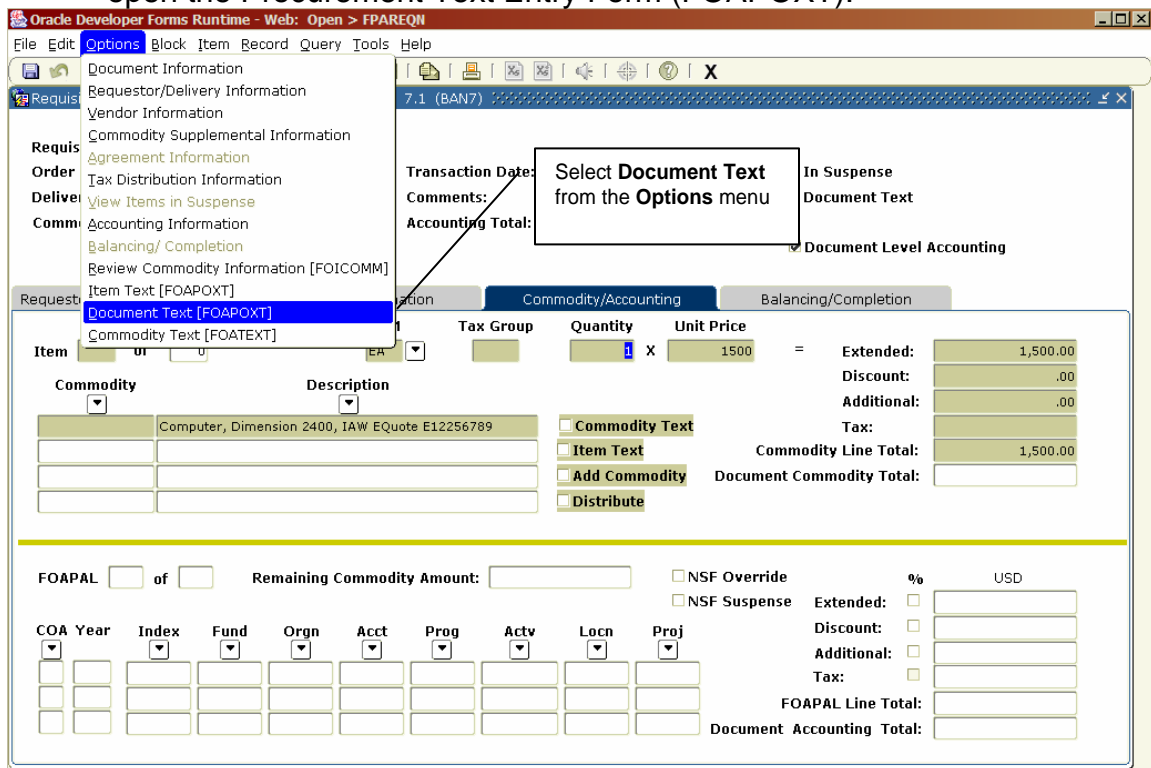

If you need to add text to your requisition that applies to the entire document, you can do so by accessing the Document Text section in FPAREQN. This is an ideal location to send a message or general information to a vendor or approver.

You can also use the Document Text to provide special instructions for payment or delivery. For example:

- "In accordance with USA Bid # ..."
- "In accordance with Alabama State Contract # ..."
- "Please fax to ..."
- "Do not have this order shipped, I will pick it up"

To add Document Text to your requisition, follow these steps:

1. Click on Options in the menu bar and select Document Text. This will open the Procurement Text Entry Form (FOAPOXT).

2. Click in the first line of the Text area of the form, and begin typing. Each line will hold 50 characters. Once you have reached 50 characters you must hit the down-arrow key to move to the next line.

Note:

If you want your text to print on the purchase order hard copy, ensure that the box next to the text line is checked. If the box is

Vendor Selection

1. Enter the vendor code in the **Vendor** block. If you are unsure of correct code, click the **Search** icon in the **Vendor** field to execute a query.

Enter vendor's address type code
Record: 1/1 <OSC>

Important:

It is essential that you verify the correct address is displayed in the Address field. Multiple addresses as well as alternate address types may exist for the same vendor. Alternate addresses may be viewed by clicking the search icon next to the Seq # field. This will bring you to screen **FOQADDR**, where you can view alternate addresses for your vendor. Examples of address types are as follows:

PO – Purchase Order

AP – Accounts Payable (billing)

HP – Hospital

Vendor Selection (continued)

The screenshot shows a web browser window titled "Oracle Developer Forms Runtime - Web: Open > FPAREQN - FOQADDR". The browser address bar shows "Address Information Query - FOQADDR 7.1 (BAN7)". The main content area displays three address profiles for "Dell Marketing LP" (ID: J00345097). Each profile includes fields for Address Type, Sequence Number, Source, Street Line 1-3, City, State or Province, Nation, ZIP or Postal Code, From Date, To Date, and an Inactive checkbox. The third address profile has its "Code" field highlighted with a red box. A callout box points to this field with the text: "Double click in the Code field to select the correct vendor address. Always use a 'PO' address." The status bar at the bottom shows "Record: 3/5" and navigation buttons.

The above example illustrates three alternate addresses for Dell Marketing. Select the proper address by double clicking in the Code field of the correct address profile.

6. Click the Next Block button to proceed to the **Commodity Information Block**.

Important:

If you are purchasing products from a new vendor, it is the department's responsibility to provide the vendor profile information to the University Purchasing Department via email or by calling 460-6151.

Vendor information for a company must include company name, address including street, city, state, and zip code.

Vendor information for an individual must include full legal name as (listed on his or her Social Security Card), address (including street, city, state, zip), phone and fax numbers.

Entering a Commodity

1. Enter the description of the item you are purchasing (computer, table, printer, etc.) in the **Description** field.

Note: Commodity Codes should never be used for requisition creation. Leave this field blank and tab to the Description field.

2. Select a unit of measure by clicking the search icon next to the **U/M** field and selecting from the menu FTVUOMS.

The screenshot shows the Oracle Requisition Entry form with the following fields and callouts:

- Next Record button:** Located in the top right corner of the form.
- Click search icon to select unit of measure:** Points to the search icon next to the U/M field.
- Select the unit of measure from menu FTVUOMS:** Points to the 'Unit of Measure List (FTVUOMS)' dropdown menu.

The 'Unit of Measure List (FTVUOMS)' dropdown menu is open, showing the following table:

Code	U/M Description	Eff Date	Te
BOX	Box	01-OCT-1963	
CEN	Centimeter	01-OCT-1963	
CON	Container	01-OCT-1963	
CSE	Case	01-OCT-1963	
CTN	Carton	01-OCT-1963	
CY	Cubic Yard/Yards	04-NOV-2005	
DZ	Dozen	01-OCT-1963	
EA	Each	01-OCT-1963	

3. Enter a quantity and unit price in the applicable fields.
4. Press the Tab key once. This will fill in the rest of the dollar amount fields.
5. (optional) If you need to add another item to your order, click on the Next Record button or press the down arrow to create a new commodity line. This will move the cursor to the next record, where you can enter a new commodity.
6. Click the next Block button to continue to the next information block.

Accounting Information

The Accounting Information Block is for your Fund and Org information. Your Fund and Org will default into the fields based on the Org number you entered in the second information block.

Note: The following instructions apply to the Document Level Accounting process. If your requisition requires the use of Commodity Level Accounting, please see instructions for Commodity Level Accounting on page 17 of this manual.

1. Enter the account number to be charged. If you don't know the account number, click the search icon next to the Account field and search for the correct account number in FTVACCT.

The screenshot shows the Oracle Developer Forms Runtime window for 'Requisition Entry: Commodity/Accounting'. The form is divided into several sections. At the top, there are fields for Requisition (R0000917), Order Date (09-MAR-2006), Delivery Date (31-MAR-2006), Commodity Total (1,500.00), Transaction Date (09-MAR-2006), and Accounting Total (.00). There are also checkboxes for 'In Suspense', 'Document Text', and 'Document Level Accounting' (which is checked). Below this is a tabbed interface with 'Commodity/Accounting' selected. The main area contains a table with columns: Item (1 of 1), U/M (EA), Tax Group, Quantity (1 X), Unit Price (1500), Extended (1,500.00), Discount (.00), Additional (.00), Tax, Commodity Line Total (1,500.00), and Document Commodity Total (1,500.00). The Commodity description is 'Computer, Dimension 2400, IAW EQuote E12256789'. Below the table is a section for 'FOAPAL' with columns: COA, Year, Index, Fund, Orgn, Acct, Prog, Actv, Locn, Proj. The 'Acct' field is highlighted with a red box, and a callout box points to it with the text 'Click the search icon to query the account.' At the bottom, there are fields for 'Enter account code' and 'Record: 1/1'.

2. Move your cursor to the Ext: field, (click in the field or use the Tab key)
3. Type the total dollar amount in the Ext: field to be charged to the specified account.
4. Press the Tab key once. This will fill in the rest of the dollar amount fields.

Accounting Information (continued)

- Click on the Next Block button to move to the next information block.

Note:

If you are only charging a portion of the overall purchase to the previously specified account, click the Next Record button or press the down arrow. This will allow you to enter additional accounts to your order, specifying the exact amounts to be charged to each account. Repeat steps 1-3 until all applicable accounts have been entered.

The amount charged to account 711530 is \$750.00

Click the Next Block button to proceed to the next information block.

Accounting Information (continued)

Commodity Level Accounting

When creating a requisition that requires you to assign accounting records to specific commodity totals rather than the document total, use the Commodity Level Accounting method in lieu of Document Level Accounting. Entry of Commodity Level Accounting requisitions are the same as Document Level accounting until you reach the Commodity/Accounting information block.

To create a Commodity Level Accounting requisition, uncheck the **Doc Acctg** check box in the upper right section of the window. Banner will now assign accounting distributions to the specific commodity rather than the document total.

Follow the instruction previously noted for entering item description, unit of measure, and unit price. Then proceed as follows:

1. Press **Next Block** to access the FOAPAL information area.
2. Press the **Search** icon for **Chart of Accounts** and select your chart if the University "U" chart of accounts did not default in this field.
3. Press the **Search** icon for **Funds** and select the applicable fund if required.
4. Press the **Search** icon for **Organization** and select the applicable organization or type the number if required.
5. Press the **Search** icon for **Accounts** and then select the applicable account or type the number.
6. Press the **Search** icon for **Programs** and then select the applicable program if required.

If the charges are to be split over two or more FOAPALS, tab to the USD column and enter the dollar amount to be charged to this FOAPAL. Press the down arrow key to get a new blank accounting record. Make the necessary Index and Account Code entries. Repeat as needed to enter all FOAPALS for this requisition.

If all charges for this requisition are to be charged to one FOAPAL, tab through the **USD** column and the dollar amount will automatically default.

To add the next commodity to your purchase order, press **Previous Block** to return to the commodity information area of the Commodity/Accounting window. Enter the commodity information for the next item to be ordered, press Next Block, and repeat steps 1-6 as required.

Accounting Information (continued)

Fixed Asset Purchases

Fixed assets are tangible items such as buildings, furniture, land, leased items, etc. that are held for long periods of time.

Important: Special steps must be taken when creating a requisition for the purchase of fixed assets. When creating a requisition for Fixed Assets purchases, you may use any Fund, Organization, or Program code from which you are authorized to make expenditures. However, you must select an Account code that is specifically set aside for fixed asset purchases in the list below. The code must correspond to the type of asset being purchased.

Capital Equipment (Tagged and Capitalized)

760300 – Equipment and Furniture > \$5,000 Fixed

760400 - Equipment and Furniture > \$5,000 Moveable

760450 – Computers > \$5,000

760460 – Copier Purchases > \$5,000

Notes:

- Commodity Level Accounting is required when ordering Capital Equipment.
- Any item purchased which has a useful life of more than one year and a purchase price in excess of \$4,999.00 must be capitalized and is considered a fixed asset.
- FTVACCT can be used to identify which account numbers are identified as capital asset account numbers.

When fixed asset items are invoiced, Banner will create a tag number in the fixed asset module. This information is transmitted to the fixed asset accountant who ensures that a permanent tag is created when required.

Balancing/Completion Block

The Balancing/Completion block is the next step in creating a requisition. If your Fund/Org numbers don't match, or your dollar amounts do not balance, you will see an error message before you reach this screen.
